AGRICULTURE

APPLIOT

TAKE IOT BEYOND

The Challenge

Sustainability & Profitability

For traditional farms, inefficient resource usage, unpredictable weather conditions, challenges in monitoring assets, and labor shortages hinder agricultural productivity.

A Digital Future

Growth demands improved energy and resource efficiency, dealing with changing weather conditions, and staying on top of soil, pest and disease challenges.

Rigorous Requirements

- Resource efficiency
- Increased yield & profitability
- Process automation across production cycles
- Cost & waste reduction
- Minimized environmental impact
- Improved animal welfare & livestock monitoring

The Solution

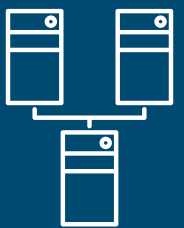

Plug n Play IOT for Agriculture

Appliot deploys IOT and the power of AI to keep your farm running at peak performance and provide real-time insights that support adaptability and productivity.

Fully scalable and end to end, Appliot is the affordable Plug n Play IOT solution to easily transform your agricultural operations into a smart farm.

The compact Appliot terminal features an electronically steered antenna with built-in modem to automatically find coverage for instant, always-on fixed and mobile connectivity.

GEO widebeam satellites enable long-range, low-power data transmission to affordably connect all your IOT devices and applications.
